

The Athletic Field Improvement Project AFIP

The Newly Configured SKHS Gators Athletic Fields

The AFIP project was started in 1999 with the goal of creating top flight playing fields for the SK student athlete. The objective was to maximize the utility of the back property to create three dedicated sport fields. With the cooperation of parents, coaches, teachers, and administrators, the project successfully revitalized the old soccer field into a 2 sport “stadium field”, and constructed 2 new fields for softball and field hockey. All three are now among the best in the area. This vision was achieved in great part from the benevolent donations of area businesses for services and materials, along with direct funding from the school, the archdiocese, and the Knott Foundation.
